Work Experience

Full Stack Developer @ Delicious Dabbas Food Chain & Co., Pune

Jan 2024 - Present (0.5 month) | Semi-fulltime

- I have been given a project to design and develop a company's website.
- My contribution is to design and develop the company's website and solve the technical problems. Website to manage the company's offers, user reviews, etc.
- In this process, I have worked with NextJs, Typescript, Tailwind CSS, MongoDB, ReactJs, state management, Figma, and some libraries.

Skills Developed: Typescript, NextJs, Tailwind, React.js, Problem Solving

R.K. jr. College, Georai

Class XII | 9.05 CGPA

2021 - 2021

St. Xavier's School, Georai

Class X | 8.58 CGPA

2019 - 2019

Projects

Ecommerce Admin & Online ecommerce Store

- To provide an admin panel for the e-commerce websites.
- Login and create, delete, update, and manage the e-commerce products on multiple stores.
- It is very useful to manage the e-commerce stores in one place.

Skills Developed: NextJs, React.js, Prisma, PostgreSQL, Tailwind, UI Design, Typescript

Chidiya - Social Media website

- To make a full-stack website like Twitter where we can post something, like, and comment on someone's post.
- Just login and use a website like Twitter.
- This is the full-stack Twitter clone in which users can create and login to the account. The user can post the tweet and like and comment on the other user's tweet. The user is able to follow the other users. The user can also edit the information on their own profile and set the profile and banner image to the account. In this project, I have used Nextjs as both the frontend and backend.

Skills Developed: React.js, Typescript, NextJs, Tailwind, MongoDB, Prisma, UI Design

Movie Stream

- The goals of the project are to stream the videos so users can watch them and make a wishlist.
- Just login and click on the play video.

Certifications & Courses

Advanced Reactjs

- From this course, I have learned about some advanced concepts of React, such as the use of hooks, form validation, props, etc.

January 2023 | [Certificate Link](#)

Java oops

- I have learned about OPP's fundamentals in Java.

March 2023 | [Certificate Link](#)

Java programming - Hackerrank

- I have learned about problem solving and programming in Java.

January 2023 | [Certificate Link](#)

- This is the full-stack movie-watching website, where users can create and login to their account. The user can watch the movies listed here with just the play button and can create a watch list or remove the movies from the watch list. In this project, I have used Nextjs as the frontend and backend, both with various libraries depending on the feature.

Skills Developed: Typescript, React.js, NextJs, MongoDB, Tailwind, Prisma, UI/UX

Achievements/ Extracurricular Activities

- In the top 10 on "Geeks for Geeks" in problem solving in the institute list.
- Cleared the institute-level round of the Smart India Hackathon.
- Solved 200+ problems on different platforms.
